PROFILE

A driven, committed and dedicated individual with a passion to succeed in everything I undertake. I have previously worked with a number of large and small organisations to support them in their individual business requirements, including HM Armed Forces. The projects covered engineering, manufacturing, food production, health and social care, admin, warehousing, logistics, solar energy, hydrogen, new technologies, LNG (bunkering operations) and oil and gas on and offshore projects. My role included the responsibility of design, development, and implementation of bespoke company projects ensuring a successful conclusion with small medium or large business projects.

Curriculum Vitae

George N Barrett

YEARS OF EXPERIENCE

45+

SUPPLEMENTARY

I am currently working as a Consultant with Gateshead College and Enterprise Ireland on design, installation and transportation programmes, as well as liaising with Lloyds testing authority on welding procedures, qualifications and certification training programmes.

I have recently completed a project involving the up skilling of a workforce to meet the Oil and Gas standards of ISO EN 3834. The project involved introducing new working procedures and skills and training to ASME IX and ISO EN 15614-1 standards.

Currently liaising with Highfield Awarding Body Consortium (HABC) on the design and development of LNG delivery programmes.

This involves the design of delivery modules, certification, examination papers and online test materials. Another project I am involved with is a new design around the storage of solar energy and battery storage to support residential properties

EXPERIENCE CONTINUED

- ➔ Bespoke Pre- Employment programmes -design qualifications bespoke to employers
- ➔ Liaise and project manage Job Centre Plus programmes – ensuring 50% into work minimum
- ➔ Manage Work Programme providers – design, delivery and successful outcomes

SELECT PROJECT EXPERIENCE

Centre Co-ordinator/Lecturer, Gateshead College

Main duties were Course Leader for the Welding and Fabrication area and managing the NVQ programme for Manufacturing and Engineering. This consists of internal and external programmes. I also managed and oversaw the Quality and Assessment Team. I was responsible for the internal verification of those programmes and liaising with external verifiers. Other duties included the communication, development and delivery of programmes with external providers and companies.

Welding Fabrication Lecturer, Gateshead College

Training and development of college students on MIG,MMA,TAGS, FCAW welding processes from introductory skills Level 1 to advanced Level 3 Welding and Fabrication standards. Responsible for the management of full cost training programmes to suit the needs of the private sector. The programme included ASME IX 6G Certification on pipe or plate materials. City & Guilds Fabrication and Sheet Metal work and pattern development apprenticeship courses

College Consultant for all external company enquiries or requests for advice, training or up skilling

Welding Supervisor, Amec Process and Energy, Wallsend

Responsible for the supervision of welders; platers; painters and shop floor operatives. Supervising between 60-80 operatives at one time. Liaising with management; clients' quality control and inspection.

Welding Inspector, Deutsche Babcock (Steels Engineering), Sunderland

Main duties were inspection of quality control assurance for pipe work for the petrochemical industry.

Welder/Team Leader, Kvaerner, Norway

Working as a welder/team leader on an offshore installation programme.
Welder/Team Leader, Pipetawse Limited, Seaton Delaval
Working on a refurbishment programme of gas fed pipelines.

Welder, Amec Offshore, Wallsend

Coded welder on oil platforms using MMA, TIG, MIG, Cunifer, Duplex, Stainless Steel, 6G Carbon, 3G, 4G, 6% Mo Chrome Alloy.
