PROFILE

Mohamed is an Exceptional Operations Team Leader who understands how to motivate plan track and monitor achievement of operational goals. He possesses seasoned abilities with identification of operational issues and the methods to address them.

He provides operational coordination to the oil spill incidents responded to by IEMS. Through allocation and directing personnel and the utilization of equipment (Booms, Skimmers), he also assists in developing and implementing oil spill contingency plans for International Oil Companies (IOC's), National Oil Companies (NOC), Maritime companies and Government agencies. He brings valuable real life to the development and implementations of OSCP through Training, site Surveys, Data review, Drill and exercise and where required operational response to live incidents.

He is responsible for daily operations at the oil spill response centre. In addition to conducting and delivering training courses for Oil Spill Response as an Instructor for IMO Level 1, 2, Beach surveillance, Beach Master and Equipment Familiarization.

EXPERIENCE

Mohamed is International Environmental & Marine Services (IEMS) "Operation Team Leader", based in Sharm Oil Spill Response Centre. He started his professional career 6 years ago in oil spill response and management. 2 years as a pollution control engineer and 4 years as operation team leader in the Egyptian Environmental Affairs Agency "EEAA" National Tier 2 Oil Spill Response Centre (OSRC) in Sharm El-Sheikh.

He has a vast experience in Site Specific Safety Plans, Risk Assessment, Risk Control, Accident/Incident investigation, Safety meetings. Tool Box talks, Emergency Response Plans. He has served
